

We met on Friday, October 2, 2026, at 1:00 PM in Glennan lounge. All members were present.

From 1:00 to 1:17, we worked together on our functional block diagram. The diagram has been completed.

We continued on to the physical architecture diagram. We completed this together at 2:00 PM. Discussed part selections such as how to implement bluetooth, turn-on switch, and screen type.

Martin, Andrew, and Aryan each developed part of the prototyping strategy while Adewola asked the professor for clarifying information on the goals of the assignment.

- Andrew - Vibration
- Aryan - Display
- Martin - Audio

When Aryan returned, we discussed plans for creating our prototypes and work to be done individually before we meet again. This is now summarized in our Gantt chart.

We discussed meeting times for next week. Andrew sent a Google calendar invite for a meeting next Monday.

Adjourned at 3:00 PM.
