

We met on Monday, September 28, 2026, At 7:30 in a zoom meeting. Adewola, Aryan, and Martin were present in the call. Andrew was not present in the call, but still contributed during the meeting.

The goal of this meeting is to finish up our Gantt chart and submit our Concept Selection alongside it.

We began by discussing how to organize the Gantt chart. We've decided to split up the gantt chart based on subtasks for each assignment and milestone we have in canvas. We're only mapping out the first two assignments, the concept selection and the system architecture, since we're unsure how we organize the work for the more distant milestones.

We will update the Gantt chart every week with the next milestone's subtasks.

Aryan worked on organizing our first milestone, the concept selection. Martin worked on setting up the next milestone, the system architecture and prototype plan. Adewola worked on setting up the verification and validation plan. Andrew fixed the formatting for the chart.

We have finished up the first three milestones for our Gantt chart. We plan on improving our Gantt chart on Wednesday.

Our meeting was adjourned at 8:54 pm.
