

This meeting began on Friday, September 4, 2026, at 1:10PM. We met in person in the Glennan lounge. All team members were present.

We began by creating a new document, based on the blank template in Canvas, to write our submission for the Project Background and Needs Assessment assignment.

To start, we started placing various ideas from the interview in bullet points to answer the questions posed in the assignment. Once we have a sufficient quantity of info, we will combine the information into coherent paragraphs.

We also constructed a rough draft of our needs statement in the same document.

After this, we all took approximately 10 minutes to write down ideas on sticky notes on our shared Figma board in silence. Then we used a Figma plugin to randomly shuffle the notes. We then organized the notes into topical groups together while discussing.

At 2:00pm, we ended the meeting to go to the class next door in the Glennan circuits lab.
