

We met on Friday, September 25, 2026, at 12:35pm in Glennan lounge. All members were present.

The goal of this meeting is to make progress on the Concept Selection assignment and potentially complete it.

We started working on the final concept selection. After our meeting with Skye on Wednesday, we decided to adapt our compass idea into a wristwatch form factor. We also decided to integrate ideas from the tactile headband.

Aryan worked on writing the justification for our concept, while Adewola used his notes from the stakeholder meeting to summarize Skye's feedback. Martin wrote a description of our final concept.

Together, we discussed revisions to our functional and technical specs and recorded them on the document.

After that, we worked on setting up the format of our Gantt Chart. We laid out the main course deadlines.

Adjourned at 2:00pm.
