We met in Glennan lounge on Saturday, October 31, 2026, at 4:30 PM. All members were present. We moved to Thinkbox soon after meeting.

Andrew began working on revising the casing model after some difficulty with accessing Solidworks. Aryan and Martin tested the device after finding some fabric and stuffing it into the existing casing. Upon some brief informal testing, this seemed to improve performance. Adewola and Martin tested the device running on battery power.

Adjourned at 7:00 PM.
